

Dear Councilor Coen,

Thanks for service!
you're the Council!

I am writing to urge you to support the resolution on 100% renewable energy for Concord. The city has an opportunity to lead the state at this time in a way that will build our economy and strength. Then our image as a livable, forward thinking community. Thank you for your consideration, course Spencer

Dear Mr. Coen -

I am writing to ask you to vote for the resolution on May 14th to make Concord 100% renewable by 2050. In addition to combatting climate change, I believe this will make Concord more attractive to new businesses and people. I believe with the trends in alternative renewable will actually cost less than fossil fuels and will make our community healthier.

Thank you for your service and for working to make Concord a great place to live.

Sincerely
Maureen Redmond-Serra

Dear Mr. Coen,

I am writing in support of your voting for the energy resolution on May 14th.

Thank you for all you do.
Edna Dennis

Dear Councilor Coen,

I just moved to Concord, one of the reasons I moved here was the forward-looking community including the goal for 100% renewable energy.

Please vote for the resolution on May 14
Thank you for all the effort and energy you put into your work.
Regards, Alex Taylor

Dear Mark,

11 April 2018

I am writing to encourage your support for 100% renewable energy resolution and ask for your vote on May 14.

It is the right thing to do for the health of our community and the vitality of our beloved city.

Thanks,
Rick Kistner, MD

Dear Mr. Coen,

April 13, 2018

I urge you to please vote for the 100% RE proposal on May 14. Jacking climate change requires moving to renewable energy in all energy uses (transportation, heat and electricity). I hope you will be as another activist I can count on Concord's opportunity to contribute. Thank you very much. Brian

Dear Mr. Coen,

Please vote for the resolution in regards to renewable energy. The less energy we use, the less we have to generate! Thank you for all you do.

Hi Mark - big roast!)

We have heard of the efforts
to pass a resolution asking
for the city to move toward
100% renewable energy by
2050. We hope you will
vote for this proposal on
May 14, Thanks! Jane & Petar
Fairchild

4/12/18

Dear Councilor Coeri:

I'm writing to encourage you
to vote for the 100% renewable
energy resolution next month. I am
convinced that with proper leadership
the world can survive and thrive ^{after}
climate change, but we must act
now. I signed up for rooftop solar
in August and generate my first
power yesterday. Thank you for being a
Council member. Sincerely, Joe Magrude

The State Employees' Association of New Hampshire, Inc.

Service Employees International Union, Local 1984

CTW, CLC

May 2, 2018

Mayor James Bouley
City Hall
Green Street
Concord, NH 03301

Dear Mayor Bouley:

The State Employees' Association of NH/SEIU Local 1984 is writing to endorse the Concord Energy and Environment Committee's proposed goal of 100 percent renewable energy for the City of Concord because we believe that action on a local level is the best way to address climate change on a global level. Based on research and data provided in the committee's advisory report, we conclude that there is an urgent need to take significant steps to combat the threat of climate change, and we applaud Concord's leadership on this critical issue. This is an exciting opportunity for Concord to inspire other cities and be a leader in New Hampshire's energy ecosystem.

As a labor union, we support environmentally friendly resolutions that will bring clean energy jobs to the area and provide greater local control over energy production, including a decrease in emissions and a reduction in health care costs in the community. We urge the City Council to pass a resolution adopting the goal and creating a framework to plan and implement the goal.

Please let us know how we can help.

Best regards,

Richard Gulla

President, SEA/SEIU Local 1984
