

March 15, 2018

Mr. Mack
41 Green Street
Concord, NH 03301

Dear Mr. Mack,

As you are aware, the road work beginning in March of 2018 and running through August of 2018 will have a major impact on the region around our high school. Our high school community includes our ninth through twelfth grade students and our regional technical students; there are over 2,000 students and staff going to the high school each day.

As a result of this project, we understand that this presents us with an opportunity to work with the city to redesign our current pick up and drop off area to substantially improve safety on Warren Street. We would like to request a revised location for pick up and drop off for the start of the fall school year. To improve safety on Warren Street, we are requesting the right side of Warren Street headed west to be an area for pick up and drop off for students, parents and staff. We understand that currently there is 2-hour parking in place for eight to ten vehicles. The district is developing a plan to increase parking capacity where the old preschool building once stood; this would increase parking in that area of between 20-25 spaces. Considering this additional parking area, we would appreciate consideration being given to simply using the current 2-hour parking spaces to pick up and drop off only. This would create a safe and effective area for parents to pick up and drop off students. We are hoping the Traffic Operations Committee (TOC) will consider this request and recommend it to City Council.

Sincerely,

Terri Forsten
