

February 8, 2023

Dear Neighbor,

As part of our everyday effort to deliver reliable energy to our customers and communities, we are preparing for an upcoming project in Concord, Pembroke and Bow, New Hampshire. This project is one of several that are designed to improve the reliability of the electric system serving New Hampshire and surrounding areas where we all work and live.

We're Always Working to Serve You Better

In September 2022, we sent you a letter regarding the identified need to replace the structures in the same corridor as the Concord to Bow (P145) Line Rebuild Project, in the communities of Concord, Pembroke and Bow. This letter is to provide an update on the anticipated maintenance work, and to inform you about upcoming field work by our contractors within the power line corridor.

What You Can Expect

This project is to replace the remaining laminate wood structures in the power line corridor with new weathering steel structures. Once the new structures are installed, we will remove the old structures from the power line corridor.

In the coming months, Eversource and its contractors will continue to be visible within the power line corridor, reviewing existing conditions, performing construction site reviews, and continuing with environmental surveys, both within the power line corridor as well as along identified off-easement access points. Outreach representatives may also leave a doorhanger at your home with additional project information. All people supporting this project carry identification and are happy to show you their company identification, upon request.

We have filed local, state, and federal permits necessary to support this work. Construction will begin once all permits have been acquired, currently anticipated for spring of this year. All construction and restoration activities are identified to be complete by summer 2024. Please keep in mind that the schedule may change due to weather or other unexpected circumstances. We will keep you informed as the schedule is finalized and update you on any major changes.

Health and Safety Is Our Top Priority

Please know that Eversource remains committed to prioritizing public health as well as the health of employees and contractors. All Eversource personnel follow applicable health and safety guidelines to help prevent the spread of COVID-19.

For More Information

Keeping the lines of communication open is important to us. We would like to connect with you to discuss the project, as well as obtain the best contact phone number and/or e-mail address to reach you moving forward.

Please contact Jennifer Codispoti at (603) 634-2007 or email Jennifer.Codispoti@eversource.com to provide that information or to discuss the project. You can also contact our projects hotline at 1-888-926-5334 or send an email to NHProjectsInfo@eversource.com.

Eversource is committed to being a good neighbor and doing our work with respect for you and your property. We will continue to provide regular project notifications via mailings, phone calls, and/or emails. You can also visit the project website, which is now live at www.eversource.com/P145-Line-Project.

Sincerely,

A handwritten signature in black ink, appearing to read 'JFC'.
