The building shell or room has been created by Allsteel using dimensions provided by the dealer, so it's the dealer's responsibility to validate that we have recreated this accurately and to do all field measurements to ensure that the quoted furniture is appropriate for the space, including aisleways.

The layout contains worksurfaces that are existing, but we have shown in order to account for the correct supports and show intended usage. We are assuming the existing worksurfaces are standard size (not sized down for HA desks). The corner cove could not be re-used, as it is not sized to be used as HA with panels. THESE WORKSURFACES HAVE BEEN REMOVED FROM THE BOM : 5 - 24x42, 5 - 24x60, 2- 24x72, 1 - 24x36. IF THIS IS NOT CORRECT, DEALER IS RESPONSIBLE FOR CORRECTING.
