Hi Janice,
Could you include this email in the next Council packet?
Thank you,
Amanda

Recently the Concord Monitor had an article "New Trash Plan Ahead". The story indicated that Concord in the next trash contract would switch to automated collection using 94 gallon totes for recycling and 64 gallon for trash. For my family these would be so large that I would probably need to store them outdoors. They also would significantly exceed the size I need. The City needs to offer as an option smaller totes, specifically a 35 gallon tote, one for trash and one for recycling. The smaller size would fit into our garage and would be more than adequate for the amount of trash and recycling that we generate each week. I am sure many other Concord residents would opt for the 35 gallon tote. If you will only provide the larger tote you need to make sure that you provide a bear proof tote for those of us that may need to store the totes outside. Recently Stratham, NH signed a contract with Casella for automated trash pick up. The totes for that contract are being provided by Rehrig Pacific. In addition to the larger totes, Rehrig Pacific manufactures a 35 gallon tote. They also manufacture bear resistant totes. My wife and I have been home owners in Concord for over 48 years and hopefully look forward to a 35 gallon tote when automated collection commences.
