Subject: changing ordinance regarding backyard chickens Article 28-5-50, section (d)
Attachments: Fran's letter to R. Werner

Good Morning!

I would like to change the current ordinance regarding the requirement to keep henhouses and fenced areas 30' from lot lines. We had five chickens and never had a problem with neighbors, noise or smells until an anonymous complaint was filed with the ordinance inspector that our fenced in area for our five chickens was not 30' from lot lines. The ordinance inspector came out and inspected our henhouse and fenced in area. The only violation he could find was that our fenced in area for the chickens (within our fenced in property) was less than 30' from lot lines. We have a corner lot with our physical home closer to the street than our neighbors' property. A local friend with a freestanding henhouse adopted our chickens and we took down the chicken run.

The chickens were more like pets than barnyard animals. We would like to have chickens again, but only if we can modify the existing ordinance. The sunniest spot in our backyard is along lot lines. When we owned chickens we learned that they enjoy sunny dust baths to keep their feathers clean and dry, which is why we extended their original run.

I testified before City Council in 2011 to allow city of Concord residents to have backyard chickens. I wanted my children to experience the joy of raising chickens, especially my animal-loving daughter. Now, I want to give her an opportunity to learn how city government works and show her that she can make a difference. We promised her we would get chickens again, but only if we change the ordinance to give the chickens room to run.

I have attached her request to Councilor Werner. What next steps do you recommend?

Thank you!

Sincerely,

Stacey Brown

Dear Councillor **Werner**,

I want to change the

laws so we can have

chickens ^{rights to property} ~~rights to property~~ ~~rights to property~~

are really helpful. They eat maggots and ants

so they would help the garden grow. We'll make

sure the chickens

stay on our

property.

We want to put them

on a sunny spot in our

property lines. Thanks for

your consideration,
W. Garden St, Concord, NH
