Honorable Mayor and Mr. Aspell:

For consideration of the Council, I am looking for a referral to Engineering, Traffic Ops, perhaps TPAC and FPAC regarding the storm drain issues as noted in the photographs below. The intent is to add this item to the C.I.P. for corrective action. This area needing attention is located at the intersection with Palm Street and North State Street, near 298 North State Street.

In speaking with David Cedarholm and the property owner, the City has been periodically addressing sinkhole issues on the private properties across from Palm Street by filling these areas. Additionally, the solution may be two fold:

1. Addresses the excess water coming down Palm Street into North State by re-directing storm-water runoff
2. Addressing the placement of existing storm drains that are located above the lowest point in the roadway, and therefore not managing the water that is collecting in the lower section.

Kindly consider distribution to the Council for referral at either the upcoming December meeting, or in January as you deem appropriate.

Regards,

Jennifer

Councilor Jennifer Kretovic
City of Concord, New Hampshire
