**Subject:** Fwd: Lights on State St

Good afternoon Matt,

Constituent question regarding exploring better lighting at crosswalks in Ward 6 is below. (or I'll add, perhaps considering those signs that blinks when someone is using a crosswalk) Just wondering how she could approach bringing the issue to a relevant committee for consideration. I will say, she's not wrong about the low visibility at night on S State in certain areas, especially with parking on both sides of the street blocking the view of people attempting to cross. I live at Concord and S State so I personally see a LOT of these challenges play out.

Anyway, given that she'd like to formalize her concerns in some way, I just want to get her the right info :)

Thank you,

Aislinn

Aislinn,

Sorry for reaching out again, I just have a question for you in your role as city councilor. How would I go about getting some more street lights on State St? I drive home from work after dark, and there are many people using the cross walks on State St at the cross streets: Harrison, West, Downing, Perley, Laurel, Thorndike, Monroe, Concord, and Thompson Streets. It's almost impossible to see the people in the crosswalks, and I am usually pretty nervous driving home because it is so dark and I am worried I will hit someone. I'm just hoping to get some street lights on those cross-streets I mentioned. Thank you!

Erin Nevin
