Subject: Fwd: Solar power

Dear Ms. Bonifant,
Can you put this into the agenda for the council meeting ? Perhaps it can be sent to the appropriate committee for consideration. Thank you.

Gail, I want to suggest the city look into placing solar panels, possibly hundreds, in the open area at Concord Airport. There looks to be 10 acres, possibly double that, which could be used. NRG company, for example, installs them (on private homes, but possibly public land) and ties the solar panels into the electric grid. There may be enough power generation for dozens, possibly hundreds of homes. Helping tax bills, offsetting city costs, this could help the city and taxpayers. So, I request the council look into this.

Thank you
Walter Carlson
