

Note: Tax Bill Format Changes

1. The tax bill is now presented on an 8.5" X 14" sheet of paper.
2. The center portion of the bill contains three years of prior tax billing history.
3. "Total Delinquent Taxes" is displayed in red in the upper right corner of the bill for increased visibility.
4. The back of the bill has a brief explanation of the tax rate segments; Local Ed, State Ed, County & City.
5. The additional information on the back of the bill is in larger print for improved legibility.
6. The July and October tax bills, which will be sent out in May, are calculated by taking 50% of the prior tax year's "Annual Tax" amount. The result is divided by 2 to create two payments, one due in July and the other in October.
7. The January and March tax bills, which will be sent out in November, are the final bills for the current tax year. The "Annual Tax" on this bill can be used for full comparison to the prior year billing history.
